Experiment Station**

General Tehnical
Report PSW-38

a user's guide to Probit Or LOgit analysis

Jacqueline L. Robertson

Robert M. Russell

N. E. Savin

Authors:

JACQUELINE L. ROBERTSON is a research entomologist assigned to the Station's insecticide evaluation research unit, at Berkeley, Calif. She earned a B.A. degree (1969) in zoology, and a Ph.D. degree (1973) in entomology at the University of California, Berkeley. She has been a member of the Station's research staff since 1966. **ROBERT M. RUSSELL** has been a computer programmer at the Station since 1965. He was graduated from Graceland College in 1953, and holds a B.S. (1956) degree in mathematics from the University of Michigan. **N. E. SAVIN** earned a B.A. degree (1956) in economics and M.A. (1960) and Ph.D. (1969) degrees in economic statistics at the University of California, Berkeley. Since 1976, he has been a fellow and lecturer with the Faculty of Economics and Politics at Trinity College, Cambridge University, England.

Acknowledgments:

We thank Benjamin Spada, Pacific Southwest Forest and Range Experiment Station, Forest Service, U.S. Department of Agriculture, Berkeley, California; and Drs. William O'Regan and Robert L. Lyon, both formerly with the Station staff, for providing valuable encouragement and criticism during the time POLO was written. We also thank Dr. M.W. Stock, University of Idaho, Moscow; Dr. David Stock, Washington State University, Pullman; Dr. John C. Nord, Southeast Forest Experiment Station, Forest Service, U.S. Department of Agriculture, Athens, Georgia; and Drs. Michael I. Haverty and Carroll B. Williams, Pacific Southwest Forest and Range Experiment Station for their suggestions regarding this guide.

CONTENTS

Introduction	1
1. Statistical Features	1
2. Aspects of Bioassay Design	2
2.1 Selection of Test Subjects	2
2.2 Sample Size	2
2.3 Dosage Selection	3
2.4 Control Groups	3
2.5 Replication	3
3. Data Input Format	4
3.1 Starter Cards	4
3.2 Header Cards	4
3.3 Preparation Cards	4
3.4 Dosage-Response Cards	4
3.5 Control Group Cards	5
3.6 Metameter	5
3.7 Command Cards	6
3.8 Sample Input for Standard Probit Analysis	7
4. Data Output Format	8
4.1 Data Printback	8
4.2 Metameter Listing	8
4.3 Analysis Message	8
4.4 Individual Preparation Printout	8
4.5 Likelihood Ratio Test of Equality ...	9
4.6 Likelihood Ratio Test of Parallelism ..	10
4.7 Summaries	10
4.8 Error Messages	10
5. Literature Cited	15
