

Title 50—Wildlife and Fisheries**PART 23—ENDANGERED SPECIES CONVENTION**

* * * * *

Subpart C—Appendices I, II and III to the Convention on International Trade in Endangered Species of Wild Fauna and Flora

* * * * *

§ 23.23 Species listed in Appendices I, II, and III.

(a) The list in this section includes species of wildlife and plants placed in Appendix I, II or III in accordance with the provisions of Articles XV and XVI of the Convention.

The list of species is organized as follows:

Major group	Subgroups
Mammals	Orders, in taxonomic sequence.
Birds	Orders, in taxonomic sequence.
Reptiles	Orders, in taxonomic sequence.
Amphibians	Orders, in taxonomic sequence.
Fishes	Orders, in taxonomic sequence.
Molluscs	Classes.
Arthropods	Classes.
Plants	Families, in alphabetical sequence.

Within each Subgroup, lower taxonomic units (mainly genera, but sometimes families or subfamilies) are listed in alphabetical

sequence. Within genera, the scientific names of the species are listed in alphabetical sequence. The scientific name takes precedence over the common name in determining if a species is listed.

(b) The appendix column of the list includes the annotation “pe” (=possibly extinct) for certain species. It also contains the names of Parties including species in Appendix III.

(c) For purposes of issuing United States certificates of exemption under Article VII(3), the date when the Convention applies to a species is the date when the inclusion of that species in the appendices enters into force under the terms of Article XV or XVI of the Convention. The date of first listing is retained if a species is transferred from one appendix to another or if a listed species is subsequently included with other species in the listing of a taxon above the species level. Such species are shown separately in this publication of the appendices. The date of a subsequent listing is used only if a species is entirely deleted from the appendices and is subsequently reincorporated after an intervening period of time.

(d) Subject to the regulations of this part are all living or dead animals or plants in Appendix I, II or III, and all their readily recognizable parts and derivatives except for (1) specified parts or derivatives of particular Appendix III animal species as excluded in the particular listing and (2) the following categorically excluded or exempted parts or derivatives of certain plants:

(1) For Appendix II and Appendix III plants and artificially propagated hybrids of

Appendix I plants: Seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers; and

(2) For Appendix II and Appendix III plants: Seeds (other than the seeds of Mexican Cactaceae originating from Mexico, which are included in the Appendices), spores, pollen (including pollinia), and artificially propagated cut flowers; and

(3) For artificially propagated hybrids of Appendix I plants: (i) seeds and pollen (including pollinia) and (ii) cut flowers; and:

(4) For artificially propagated or naturalized Appendix II Cactaceae species: (i) fruits and their parts and derivatives; (ii) for *Opuntia* subgenus *Opuntia* species, separate stem joints (pads) and their parts and derivatives.

(5) For Orchidaceae species: (i) in Appendix I, seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers; (ii) in Appendix II, for artificially propagated *Vanilla* species, the fruits and their parts and derivatives.

(e) The list of species set out in subsection (f) is informational and not regulatory in nature. It is solely intended as a convenience to the public. The official list of species included in Appendices I, II, and III is the one maintained by the CITES Secretariat based on the decisions of the Parties to the Convention.

(f) The list of species in the Appendices to the Convention on International Trade in Endangered Species of Wild Fauna and Flora is provided below:
