Chapter 1. Purpose of and Need for Action.....	1
Project Location	1
Scope of Analysis.....	1
Purpose and Need for Action	3
Proposed Action	4
Decision Framework	6
Public Involvement	7
Issues.....	8
Chapter 2. Alternatives, Including the Proposed Action.....	11
Alternatives Considered but Eliminated from Detailed Study	11
Items Common to All Action Alternatives	13
Alternatives Considered In Detail.....	14
Monitoring	16
Chapter 3. Environmental Consequences	21
Soil and Watershed.....	21
Vegetation and Range Condition.....	31
Jicarilla Wild Horses	51
Wildlife	64
Gas Development.....	79
Recreation	80
Social Effects	82
Livestock Grazing.....	83
Heritage Resources	84
Appendix A. Project Record Index	89
Appendix B. Wild Free-Roaming Horses and Burros Act	99
Appendix C. Considerations Concerning Stocking Rates	105
Appendix D. Contraception As An Option on The Jicarilla Wild Horse Territory .	117

List of Tables

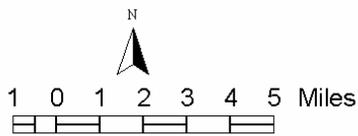

Table 1. Comparison of Alternatives	14
Table 2. Comparison of Effects	17
Table 3. Terrestrial Ecosystem Survey Map Unit Information	23
Table 4. Soil Stability by TES Unit From Fall 2003 Range/Soil Transect Data [16, 260a]	26
Table 5. 5 th Code Watersheds in the Jicarilla Wild Horse Territory	28
Table 6. Vegetation Composition Within the Jicarilla Wild Horse Territory	31
Table 7. Range Transect History: Range Condition and Trend [26a, 260a]	34
Table 8. 1975 Combined Range Analysis for the Bancos, Cabresto and Carracas Allotments on the JWHT. [26a].....	42
Table 9. Actual Cattle Grazing Use Over the Past 20 Years on Allotments Within JWHT	43
Table 10. Comparison of Grazing Use (Animal Unit Months) By Cattle and Wild Horses 1994-2004.	46
Table 11. Comparison of Estimated Utilization on the JWHT By Alternative.....	47
Table 12. Estimated Annual Forage Production (lbs.) and Allocation	47
Table 13. Estimated Capacity For Each Alternative.....	48
Table 14. Horse Color on the Jicarilla Wild Horse Territory	53
Table 15. Wild Horse Surveys 1912-Present	54
Table 16. Management Indicator Species Habitat Within the Jicarilla Wild Horse Territory	67
Table 17. Priority List of Migratory Birds Considered But Not Analyzed.....	71
Table 18. Priority Species for Great Basin Shrubland.....	71
Table 19. Priority Species for Montane Shrub	72
Table 20. Priority Species for Piñon-Juniper Woodland.....	73
Table 21. Priority Species for Ponderosa Pine	74
Table 22. Priority Species for Mixed Conifer Forest.....	75
Table 23. Priority Species for Plains and Mesa Grassland	76
Table 24. Priority Species for Cave/Rock/Cliff.....	77

List of Figures

Figure 1. General Location.....	4
Figure 2. Jicarilla Wild Horse Territory.....	2
Figure 3. Terrestrial Ecosystem Survey Units Within the Jicarilla Wild Horse Territory	22
Figure 4. American Canyon adjacent to Cabresto Canyon on the Cabresto allotment taken in the fall of 2003. TES map unit 70/71, key grazing area ½ mile from water. Drought combined with heavy grazing use has left this previously reseeded flat with little protection from erosion. Herbaceous cover is primarily made up of annuals with some western wheatgrass and blue grama.....	26
Figure 5. The Cabresto Allotment in Bancos Canyon taken in fall of 2003. Severe rill and gully erosion at the toe of the slope between TES map units 70/71 and 769. Erosion of this nature is common in Bancos Canyon.	27
Figure 6. Vegetation Within Jicarilla the Wild Horse Territory	32

Figure 7. Range transect in Cabresto Canyon taken September 1973, two years after chaining and reseeded primarily with crested wheat.	36
Figure 8. Range transect taken in same location as previous photo in fall 2003. The site is invaded with sagebrush and the seeded species are only a remnant.	36
Figure 9. Plot photo in Cabresto Canyon on the Bancos Allotment taken in fall 1973.	37
Figure 10. Same plot photo as previous figure taken in fall 2003.	37
Figure 11. Range transect photo from fall 1973 in Cabresto Canyon on the Cabresto Allotment.	38
Figure 12. Same photo location as previous figure. Transect data indicates a decline in range condition from fair with and upward trend in 1973 to poor with a downward trend in 2003.	38
Figure 13. Range Transect Photo from fall 1973. Reseeding in the Lynch Ranch area on the Bancos Allotment.	39
Figure 14. Photo taken in same location as previous figure in fall 2003. The site is invaded with sagebrush and the seeded species are only a remnant.	39
Figure 15. Range transect photo in fall 1973 in Bancos Canyon on the Cabresto Allotment.	40
Figure 16. Same photo location as previous figure. Transect data indicates a decline in range condition from fair with and upward trend in 1973 to poor condition with a downward trend in 2003. Notice the difference in grazing use. This is an area currently being grazed hard by horses. Even the sagebrush is heavily browsed.	40
Figure 17. Range transect plot photo taken fall 1973 in Bancos Canyon on the Cabresto Allotment. Notice the western wheatgrass seedlings in the plot.	41
Figure 18 Same photo location as previous figure. The comparison of the two plots look similar, however the absence of the western wheatgrass in this photo is an important indicator of a downward trend.	41
Figure 19. Typical opening on Carracas Mesa, which receives heavy grazing use from horses. The site is dominated by annuals. In the background is a large stand of sunflowers. ..	46
Figure 20. Percent Recruitment Within the Jicarilla Wild Horse Population from 2000-2004	53
