Domingo Springs Water System Vandalized

Chester, Calif.... For years visitors to Domingo Springs Campground have enjoyed camping and relaxing at this quiet out of the way location. Recently, the water system at Domingo Springs campground was vandalized; the result of this vandalism has caused surface water contamination of the spring's source. Janie Ackley, Almanor Ranger District Recreation Officer commented, "We are exploring options on how to safely repair the damage, as well as secure the spring source. Currently, potable drinking water is not available at the campground or the spring until restoration work can be accomplished this summer."

If you have any information on the vandalism, please contact Mike Zunino, Law Enforcement Captain at (530) 252-6400.

If you plan to camp at Domingo Springs, be prepared and remember to bring plenty of cooking and drinking water with you. To find out more information on the progress of the repairs contact the Almanor Ranger District at (530) 258-2141.
