

Chapter 3 Affected Environment and Environmental Consequences

3.1 Introduction

- 3.1.1 Social and Economic Condition
- 3.1.2 Physical and Biological Setting
- 3.1.3 Ecosystem Management
- 3.1.4 Analysis
- 3.1.5 Chapter Organization

3.2 Forest Vegetation

- 3.2.1 Forest Age and Structure
- 3.2.2 Forest Spatial Patterns
- 3.2.3 Forest Insects and Disease

3.3 Wildlife

- 3.3.0 Introduction
- 3.3.1 Forest Type and Age - Management Indicator Habitats
- 3.3.2 Spatial Patterns – Management Indicator Habitats
- 3.3.3 Aquatic Management Indicator Habitats
- 3.3.4 Threatened and Endangered Species
- 3.3.5 Regional Forester Sensitive Species
- 3.3.6 Other Species of Management Concern
- 3.3.7 Non-native Invasive Species
- 3.3.8 Recreation Impacts

3.4 Timber

- 3.4.1 Uneven-aged versus Even-aged Management Prescriptions
- 3.4.2 Timber Supply
- 3.4.3 Mix of Forest Products

3.5 Role of Fire

3.6 Watershed Health

- 3.6.1 Watershed Management
- 3.6.2 Riparian and Fish Management

3.7 Special Designations

- 3.7.1 Potential Wilderness Additions
- 3.7.2 Potential RNA Additions

3.8 Recreation

- 3.8.1 Recreational Opportunities and Forest Settings
- 3.8.2 Scenic Integrity
- 3.8.3 Recreational Motor Vehicles
- 3.8.4 Water Access

3.9 Economic and Social Sustainability

- 3.9.1 Economic Sustainability of Local Communities
- 3.9.2 Social Sustainability
- 3.9.3 Heritage Resources

3.10 Other Disclosures
